APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 63345 is issued subject to the terms and conditions imposed in said Permit 63345 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The applicant will provide a monitoring plan developed in cooperation with National Parks Service, for approval by the State Engineer for the purpose of tracking water levels in two wells in the area of the production well before any pumpage of the well authorized under this permit is allowed.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use and not to exceed 2.0 cubic feet per second, but not to exceed 300 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

April 9, 2004

Proof of completion of work shall be filed before:

May 9, 2004

Water must be placed to beneficial use on or before:

April 9, 2006

Proof of the application of water to beneficial use shall be filed on or before:

May 9, 2006

Map in support of proof of beneficial use shall be filed on or before:
